

MICHAEL CHADOLIAS

☎ +30 69 4220 1140 | ✉ mchadolias@gmail.com | 🔗 LinkedIn | 🐙 GitHub | 📍 Kavala, Greece

Physics graduate specialising in astroparticle physics with hands-on experience in neutrino physics, large-scale workflow pipelines, and machine learning for high-energy physics. Credited as co-author on nine peer-reviewed KM3NeT publications for contributions to the collaboration. Looking to pursue a PhD in astroparticle physics.

RESEARCH INTERESTS

Astroparticle physics, Neutrino physics, Dark matter, Data science & AI, Statistical & Computational methods

EDUCATION

Friedrich-Alexander-Universität Erlangen-Nürnberg

M.Sc. in Physics (Specialisation: Astrophysics and astroparticle physics)

Grade: 1.6/1.0 Equivalent grade: 90/100

Erlangen, Germany

Apr 2022 – February 2025

Research: Active participation in the ANTARES/KM3NeT collaboration

Aristotle University of Thessaloniki (AUTH)

B.Sc. in Physics; Grade: 7.84/10.00

Thessaloniki, Greece

Oct 2018 – Mar 2022

Teaching Assistant: HM 131: Systems Reliability under Prof. Alkiviadis Hatzopoulos

Among the top 10% of students during my graduation period

RESEARCH EXPERIENCE

Erlangen Centre for Astroparticle Physics (ECAP)

Master Thesis Student

Erlangen, Germany

Aug 2023 – Oct 2024, Full-time

- Conducted the first feasibility study on tau neutrino appearance using the full duration of ANTARES, evaluating the reconstruction quality of the events and providing the first estimate of the detector's capabilities.
- Developed a scalable pipeline to convert over 500k ANTARES Monte Carlo event files to TTree-based ROOT files, reducing pre-processing time by 20%, storage requirements by 35%, and enabling parallelised cluster execution (NHR@FAU & CC@Lyon).
- Analysed 200+ different oscillation scenarios with the SWIM software, accounting for the possible cut selection criteria, model parameters, and systematic uncertainties.
- Compared the tau appearance potential from ANTARES against KM3NeT/ORCA predicted sensitivities.

Erlangen Centre for Astroparticle Physics (ECAP)

Graduate Research Assistant

Erlangen, Germany

Nov 2022 – Apr 2023, Part-time

- Co-developed and tested modules within a Snakemake-based MC production pipeline for ORCA events.
- Performed testing and diagnostics of pipeline jobs on NHR@FAU cluster, reducing execution errors and improving workflow reproducibility.
- Achieved 25% CPU workload reduction by improving the SLURM profile, identifying inefficient parallelisation patterns, and optimising Snakemake rule resources.

National Centre of Scientific Research Democritus (NCSR)

Undergraduate Research Assistant

Athens, Greece

Nov 2021 – Jan 2022, Internship

- Studied the reconstruction quality of simulated events focusing on the limited 6 string KM3NeT/ORCA detector configuration (ORCA6).
- Analysed ν_μ interaction topologies across key metrics such as energy, zenith angle, inelasticity, and distance from the detector, among others.
- Assisted in the optical module integration and component testing.

SpaceDot Team - AcubeSAT Project

Undergraduate Researcher & Sub-team Coordinator

Thessaloniki, Greece

Mar 2019 – Dec 2021, Part-time

- Led the trajectory subsystem and co-authored a proposal for ESA's "Fly your satellite" programme
- Modelled the space environment for the mission with the OMERE, and estimated the radiation levels during the entire duration of the mission with the FASTRAD software, with this work being credited as my bachelor's thesis.

RELEVANT COURSEWORK

Specialisation Lectures: Particle Physics, Astroparticle Physics, Neutrino Physics & Astronomy

Minor coursework: Computational Physics and Numerical Methods, Methods of Data Analysis

SKILLS

Languages: Python, C/C++, Bash, SQL

Frameworks & Tools: ROOT, SWIM, TensorFlow, PyTorch, GraphNet, JAX

Computing Methods: High-Performance Computing (Slurm, UNIX), Workflow Management (Snakemake), Version Control (Git), CI/CD (Github Actions), Containerization (Docker, Apptainer)

Foreign Languages: Greek (Mother), English(C2), German(B2), Italian(A1)

Soft Skills: Team player, analytical thinker, problem-solving, adaptability

CONFERENCES & WORKSHOPS

Analysis Reproducibility <i>Participant</i>	Mar 2025 <i>Online</i>
12th HEP C++ Course and Hands-on Training - The Essentials <i>Participant</i>	Mar 2025 <i>Online</i>
KM3NeT Bootcamp <i>Participant</i>	Dec 2024 <i>Erlangen, DE</i>
DPG Spring Meeting <i>Speaker: Feasibility study of tau appearance measurement with the ANTARES neutrino telescope (T 29.2)</i>	Mar 2024 <i>Karlsruhe, DE</i>
KM3NeT Oscillation WG Meeting <i>Speaker: Feasibility study of tau appearance measurement with the ANTARES neutrino telescope</i>	Dec 2023 <i>Erlangen, DE</i>
KM3NeT Bootcamp <i>Participant</i>	Oct 2023 <i>Online</i>
GraphNeT III - Workshop <i>Participant</i>	May 2023 <i>Sandvig, DN</i>

VOLUNTEERING

Long Night of Sciences, FAU <i>Volunteer - Neutrino Group ECAP</i> Presented neutrino detection concepts to 1100+ visitors at ECAP through posters and demos, as well as showcasing the group's contributions to neutrino physics & astronomy.	Erlangen, Germany <i>October 2023</i>
AUTH - CERN Masterclass <i>Volunteer</i> Guided 10 high school students through ATLAS event identification exercises during the AUTH-CERN Masterclass.	Thessaloniki, Greece <i>Mar 2021</i>
Physicists of Aristotle university of Thessaloniki (PATH) <i>Group coordinator</i> - Organized the speaker list and conference logistics to highlight undergraduate research in physics for the second iteration of the $\Sigma\Pi E\Phi$ conference. - Facilitated student visits to research labs through the 'Labs & Paths' event, helping fellow students engage with the research conducted in the department.	Thessaloniki, Greece <i>Nov 2017 – Jun 2019</i>

HOBBIES

Chess (Ex-professional player, national arbiter), Basketball, Hiking, D&D fan, Book-club member
