☎ +30 6942 201 140 | ✉ mchadolias@gmail.com | 🌐 Website | 🔗 LinkedIn | 🟢 ORCID | 🐙 GitHub

Incoming doctoral student in neutrino physics at the Instituto de Física Corpuscular (IFIC) and the Universitat de València, working within the KM3NeT collaboration. Research experience spans neutrino physics analyses, simulation and data-processing pipelines, and machine-learning methods in astroparticle physics.

RESEARCH INTERESTS

Neutrino physics, Particle & astroparticle physics, Statistical & Computational methods, Data science & AI

EDUCATION

Friedrich-Alexander-Universität Erlangen-Nürnberg

Erlangen, Germany

M.Sc. in Physics (Specialisation: Astrophysics and astroparticle physics)

Apr 2022 – Feb 2025

Grade: 1.6/1.0 Equivalent grade: 90/100

Research: Active participation in the ANTARES/KM3NeT collaboration

Aristotle University of Thessaloniki (AUTH)

Thessaloniki, Greece

B.Sc. in Physics; Grade: 7.84/10.00

Oct 2017 – Feb 2022

Teaching Assistant: HM 131: Systems Reliability under Prof. Alkiviadis Hatzopoulos

Project Involvement: Active member of the AcubeSAT project

RESEARCH EXPERIENCE

Erlangen Centre for Astroparticle Physics (ECAP)

Erlangen, Germany

Master Thesis Student (Thesis)

Aug 2023 – Oct 2024, Full-time

- Conducted the first feasibility study on tau neutrino appearance using ANTARES simulated data, evaluating the reconstruction quality of the events and providing the first estimate of the detector's capabilities.
- Developed a scalable pipeline to convert over 500k ANTARES Monte Carlo event files to TTree-based ROOT files, reducing pre-processing time by 20%, storage requirements by 35%, and enabling parallelised cluster execution (NHR@FAU & CC@Lyon).
- Analysed 200+ different oscillation scenarios with the SWIM software, accounting for the possible cut selection criteria, model parameters, and systematic uncertainties.
- Compared the tau appearance potential from ANTARES against KM3NeT/ORCA predicted sensitivities.

Erlangen Centre for Astroparticle Physics (ECAP)

Erlangen, Germany

Research Assistant (HiWi)

Nov 2022 – Apr 2023, Contract

- Co-developed and tested modules within a Snakemake-based MC production pipeline for ORCA events.
- Performed testing and diagnostics of pipeline jobs on NHR@FAU cluster, reducing execution errors and improving workflow reproducibility.
- Achieved 25% CPU workload reduction by improving the SLURM profile, identifying inefficient parallelisation patterns, and optimising Snakemake rule resources.

National Centre of Scientific Research Demokritos (NCSR)

Athens, Greece

Undergraduate Research Assistant (Report)

Nov 2021 – Jan 2022, Internship

- Studied the reconstruction quality of simulated events focusing on the limited 6-string KM3NeT/ORCA detector configuration (ORCA6).
- Analysed ν_μ interaction topologies across key metrics such as energy, zenith angle, inelasticity, and distance from the detector, among others.
- Assisted in the optical module integration and component testing.

SpaceDot Team - AcubeSAT Project

Thessaloniki, Greece

Undergraduate Researcher & Sub-team Coordinator (Thesis)

Mar 2019 – Dec 2021, Part-time

- Led the trajectory subsystem and co-authored a proposal for ESA's "Fly Your Satellite" programme
- Modelled the space environment for the mission with the OMERE, and estimated the radiation levels during the entire duration of the mission with the FASTRAD software, with this work being credited as my bachelor's thesis.

RELEVANT COURSEWORK

Specialisation: Particle Physics, Astroparticle Physics, Quantum Field Theory, Neutrino Physics, Neutrino Astronomy
Programming: Computational Physics and Numerical Methods, Methods of Data Analysis

SKILLS

Languages: Python, C/C++, Bash, SQL
Frameworks & Tools: ROOT, SWIM, OscProb, PyTorch, GraphNet, TensorFlow, nuSQuIDS
Computing Methods: High-Performance Computing (SLURM, UNIX), Workflow Management (Snakemake), Version Control (Git), CI/CD (GitHub Actions), Containerization (Docker, Apptainer)
Foreign Languages: Greek (Native), English (C2), German (B2), Italian (A1)
Soft Skills: Team player, analytical thinker, problem-solving, adaptability

CONFERENCES & WORKSHOPS

ANTARES-KM3NeT Analysis Meeting	Oct 2025
<i>Participant (Remote)</i>	CERN, CH
Analysis Reproducibility	Mar 2025
<i>Participant</i>	Online
12th HEP C++ Course and Hands-on Training - The Essentials	Mar 2025
<i>Participant</i>	Online
KM3NeT Bootcamp	Dec 2024
<i>Participant</i>	Erlangen, DE
DPG Spring Meeting	Mar 2024
<i>Speaker: Feasibility study of tau appearance measurement with the ANTARES neutrino telescope (T 29.2)</i>	Karlsruhe, DE
KM3NeT Oscillation WG Meeting	Dec 2023
<i>Speaker: Feasibility study of tau appearance measurement with the ANTARES neutrino telescope</i>	Erlangen, DE
KM3NeT Bootcamp	Oct 2023
<i>Participant (Remote)</i>	Paris, FR
GraphNet III - Workshop	May 2023
<i>Participant</i>	Sandvig, DK

VOLUNTEERING

Long Night of Sciences, FAU	Erlangen, Germany
<i>Volunteer - Neutrino Group ECAP</i>	October 2023
Presented neutrino detection concepts to 1100+ visitors at ECAP through posters and demonstrations, as well as showcasing the group's contributions to neutrino physics & astronomy.	
AUTH - CERN Masterclass	Thessaloniki, Greece
<i>Volunteer</i>	Mar 2021
Guided 10 high school students through ATLAS event identification exercises during the AUTH-CERN Masterclass.	
Physicists of Aristotle University of Thessaloniki (PATH)	Thessaloniki, Greece
<i>Group Coordinator</i>	Nov 2017 – Jun 2019
- Organized the speaker list and conference logistics to highlight undergraduate research in physics for the second iteration of the $\Sigma\Pi E\Phi$ conference. - Facilitated student visits to research labs through the 'Labs & Paths' event, helping fellow students engage with the research conducted in the department.
